Notary Public, City of St. Louis, Mo My term expires April 15, 1865.

WORLD'S-1904-FAIR.

COMPLETE PARK SYSTEM.

During the next two years the city must adopt thorough plans and outline a complete park system. If the exceptional opportunities are utilized St. Louis should have a park scheme, with grounds and roadways, nowhere surpassed in the United States, if in the world.

Six chief factors enter into the general design. which at present lies within the World's Fair site. Second, the construction of a wide driveway and promenade around Forest Park, requiring the improvement of Lindell boulevard, Skinker road and Oakland avenue. Third, the improvement of King's highway, as a parkway, to connect the cemeteries and all of the big parks, forming a boulevard from the northern city limits to the southern. Fourth, the construction of a riverside drive. Fifth, the establishment of additional small parks. Sixth, the establishment of a downtown park, as, for instance, the proposed Union Station Park.

Two improvements must be made at the earliest time. One is reconstruction of the Exposition part of Forest Park; the other is the improvement of King's highway. The former is inevitable. The latter is theoretically, an optional project; practically, however, It is almost as compulsory as the betterment of Forest Park. The improvement of King's highway is absolutely necessary for the establishment of an ideal park system.

Unless there be method in the procedure the real ization of the plans will be far from satisfactory. What will be done to restore and better Forest Park is a problem of a year hence; for, although the officials and public-spirited citizens who are directly responsible for the work have a general conception of what should be done, they cannot possibly forecast the finished details. But the establishment of a parkway, the improvement of King's highway, is an opportunity of the present and should be accepted at once.

It would be well for the city officials to discuss the park-system plans with the best authorities and labor to impress the importance of the enterprise on all good citizens. There is a necessity for method in the work. Next to kindling interest in the project, so that its fruition may be assured, it is necessary that

all of the separate plans should barmonize. The money invested will go farther and the results will be better if the work be started and carried out with reference to a settled ultimate design, First make claborate, specific plans. Then formulate a method for fulfilling them. Lastly, follow the plans and the method literally. In this way St. Louis will build one of the finest park systems in the world; will build it economically and artistically.

GRAFT ON A SCALE.

Such developments of the various Washington scanthe mind of the average newspaper reader even those menger accounts which are procurable indicate a bewildering variety of swindling schemes, and these you should neglect your instrument of pleasure so style. reports, partly because of the administration's palpa- that it goes out don't relight it until you have blown ble efforts to suppress the scandal altogether, are through it to remove the stale smoke. in this country which are manufactured contrary to ministration? the laws of the country from which they are exported. Certain German stuffs are not marketable in the home country, it is alleged, because of chemical compounds and adulterations. But it is significant and they are being patronized by the children in their that the articles in question have passed inspection in this country and that no objection has heretofore been taken to the alleged compounds and adulterations; Civic Improvement League is doing life-saving work and doubly significant that the purpose of the law | in this field. is retaliatory and the intent is to absord it when Germany shall have been "brought to terms." It looks very much as if the administration had opportunely seized upon the fact of technical nonmarket ability for want of a better excuse. It is reasonably certain that when Germany shall have made certain desirable tariff concessions our prodigiously vigilant protectors will drop their squeamishness, admit the goods as heretofore time out of mind, and apologize to the German manufacturers. Officials of the Agricultural Department make no secret of the fact that the "pure-food" law is to be operated not for the pro- country. tection of the American consumer's health, but simply as a retallatory measure to counteract tariff discrim-

inations. In the light of all tariff experience, how can a retaliation produce the desired result? "Reciprocity." which is the cuphemism for tariff warfare, has preceeded upon the scheme of going the enemy one bet ter-or one worse. Nations have demonstrated human nature. Tariff blows met by blows have not led to pacification. Bad met by bad has not brought good. First, the development of that part of Forest Park icy of "reciprocity" the administration has for some Bad has become worse. Pursuant to the present poltime gradually and of late almost precipitately in volved the United States in tariff difficulties with the other principal nations. A series of discriminations and retaliations has resulted in damage and in somcases in annihilation of trade.

> With Canada we are at outs. England is considering the advisability of hitting back. Germany has struck severe blows. France and Italy are likely to retalinte soon for the injury done them. As among themselves these nations are involved to a like extent. In general the tendency is toward more and harder blows and a severance of trade relationships. Retaliation is suicidal.

GOOD SMOKING.

Every man should excel at something or other. Once upon a time there was a person named Pat whose death quite nonplused his friends, not because he was a man whose virtues would be missed, but because they were at a loss for something good to say of him at his wake. There was present such an overwhelming sense of Pat's notorious deficiencles that the mourners sat dumb for many hours. Everybody racked his brain for something complimentary, without success. From embarrassing, the situation became intolerable, until finally one genius hit upon an idea which redeemed the dead man's character and saved the day. "Sure," he blurted out, "Pat wor a foine old shmoker."

Everything worth doing is worth doing well. A philosopher recently devised a set of instructions for the sake of better smoking. Since there are so many of us who do nothing else well we should acquire proficiency in this. The rules are something after this manner:

Don't light your eigar while you are discussing year own opinions, your ideals, or your politics; wait until the other fellow begins to enlighten you. You will have more time and will not char the weed or roast your fingers. When you light a cigar hold it in

your mouth and draw on it. Don't smoke like a fiend or a fire engine. Do it gently and gracefully, imitating the man who "thinks like a sage and acts like a Samaritan." For him the cigar reserves its sweetest fragrance. A cigar smoked continuously becomes overheated and its fine qualities are lost.

There are two wrappers, the outer and the bunch wrapper, upon which depend the smoker's enjoyment -of course a good filler is necessary as well-but the Edward. That is not the British way. Instead, the King ignorant man will squeeze or pinch his cigar until the seized the right hand of the President and worked it up dals as escape the vigilance of the administration's ignorant man will squeeze or pinch his cigar until the friends and find their way into print add to the con- wrappers leak, and he will thump away at the ash firmation of belief that graft is deep-rooted in prac- end, mangling it until it flares like smoking flax. tically every department of executive business. To Don't "worry" a cigar. Let the ashes alone; they may be depended upon to fall off of their own accord.

Be sure you are right and then go shead. But if should avoid polite society. Better throw the snipe Considering the difficulties which attend the gath- away at once. There are, besides the badly instruct-

RECENT COMMENT

What People Read. Inicago Record-Herald.

The report of the librarian of the Chicago Public Library shows that out of 1,165,568 volumes withdrawn for ome use 856.008 volumes, or about 73 per cent, were di-Professor W. J. McGee Appointed Chief ided between English prose fiction and juvenile literature. inicago resembles other American communities in its preference for works of this class, and the taste that is thus shown is often the subject of regret among people business.

In one sense this regret is well founded because a large percentage of the fiction that is read is of an inferior ort. The time that is spent upon it might be devoted such more profitably to better reading or to healthful recreation out of doors, and there is perhaps no more ommon fallacy than that contained in the notion that here is a virtue in devouring books, even if the standard of selection is poor. This itself is one of the most miseading of fictions, and it certainly deserves no encourdepartment, and it certainly deserves no encour-department, and the grounds adjacent and agement. The literary pretensions that are based upon it lying to the west of the hall have been set

At the same time there is no proof that the worthless ooks displace the good books. Most of the people who ead ephemeral stories for the mental excitement and to appropriation of \$50,000 by the Exposition hass away the time would never take to the classic with Frederick Harrison or put themselves through a course of the best hundred books selected by Sir John Lubbock. the tribes of North America will be repre-They would find Milton insufferable, Shakespeare intersting in spots only, and the most brilliant essayists ponderous.

An Entire Village Pauperized. Philadelphia Ledger.

A good many years ago a wealthy and philanthropic English woman left to her native village, which was one of the most delightful, beautiful and prosperous in the exhibition of Indian industries and Indian British Isles, a large sum of money to be held in trust. schools. the income to be applied from time to time to the genuine needs of worthy applicants. After a generation of the administration of the trust a sociological inquirer made a study of the village and found that the money thus generously but unwisely given had practically pauperized the whole place. The stamina of the self-supporting yeomen had departed, and from being a self-respecting World's Fair Commission to-day fixed Auand self-supporting virile people they had gradually come to lean more and more on this fund, which they knew was held in reserve as a last resource, until finally they nearly all became paupers and dependents and incompetents. The generous and philanthropic giver had laid a blight on a smiling land worse than any curse.

King Edward Wouldn't Kiss Loubet.

Cieveland Plain Dealer. Official kissing is not the style in England, as President Loubet discovered the other day. When he was about to eave, after having had "the time of his life" among the "hereditary enemies" of this country, the French President prepared to submit himself to the embraces of King and down so vigorously that he nearly pumped tears out of Loubet's eyes, while with his left hand he patted the President's shoulder. The British style suggests friendliness in the conventional pump-handle handshape, and patronizing affection in the shoulder patting. Insincerity might lurk in the continental kissing, but there was evident good will, if a triffe patronizing, in the royal British

Philadelphia Record. he has no notion of retiring from active politics, least of all from the chairmanship of the Republican National Committee. As chairman he will, of course, not be willing to part with Perry S. Heath, who, as secretary of the comittee, has acquired great experience in frying campaign fat out of the trusts and in other necessary transactions The Post-Office revelations can leave President Roosevelt under no illusion as to the campaign methods for his election, and the attendant obligations, with Hanna and Heath as respective chairman and secretary of the national com-
